

Internship, Mechanical Department (W/M/O)

Internship period: 6 months, with possibility of extending. Starting date: continuously

Organisation: Nordic Folkecenter for Renewable Energy.

Folkecenter is a non-profit, independent, organisation that has worked for a complete replacement of fossil fuels and atomic power with renewable energies since 1983. The centre provides research, development of technology, training and information for the manufacture, industrial innovation and implementation of renewable energy technologies and energy savings in Denmark and throughout the world. Folkecenter obtains support from local authorities, national and international agencies and the industry.

The organisation works on four major fronts:

1. Development and implementation of renewable energy systems;
2. Consultancy to manufacturers, local consumer groups and relevant initiators within renewable energy;
3. Dissemination of information on renewable energy in Denmark and elsewhere.
4. Demonstration of practical examples of integration of several energy solutions at The Village for Green Research, where Folkecenter is situated. The ecovillage is an experimental and functional example of a future ecological society;

Tasks and responsibilities:

- Assemble a DIY laser-cutting machine and test its functionality
- Various tasks related to laser-cutting in collaboration with a SME

Requirements:

- Fluent English, both spoken and written;
- Interest in renewable energy

Appreciated:

- Initiative;
- Self-driven;
- Willing to work in an international team;

If you are interested, please send your CV and a cover letter to: Daniele Pagani, dp@folkecenter.dk with subject: "Internship Mechanical Department".
