

# *NordWetCap – Nordic Capacity Building for Wetland Restoration and Climate Resilience.*

## **Project Goal:**

The project focuses on restoring wetlands as a central nature-based climate solution and combines practical action, local dialogue, and political learning across the Nordic region.

## **The goals are to:**

- ✓ make wetland restoration easier to understand and more widely accepted
- ✓ build local capacity among landowners and municipalities
- ✓ develop a shared Nordic model
- ✓ create a lasting network: Nordic Community for Ecosystem Restoration (NCER)

**Responsible organization/project leader:** The Westfjord Regional Development Office, (WRDO Iceland) Photo: SINTEF

**Project period:** 2026-2028

**Project type:** Collaborative Nordic Project to meet social, political and practical challenges in wetland restoration

**NKLP financing:** 945.815 DKK

**Project number:** 2025\_45

**Partners:** Nordic Folkecenter for Renewable Energy and SINTEF (Norway)
